## Subject Index - Volume 21, 1981

| Subject              | Page           | Subject                | Page   |
|----------------------|----------------|------------------------|--------|
| acetyl choline       | 76             | basolateral membrane   | 29     |
| acidosis             | 68             | bicarbonate secretion  | 80     |
| adenosine            | 59             | Boltenia               | 32     |
| alanine              | 64             | brain, Na, K, Cl       | 4      |
| alanine transport    | 83             | brain volume           | 4      |
| albumin              | 108            | branchial permeability | 11     |
| alkaline gland       | 80             | brush border membranes | 86     |
| alkaline phosphatase | 86             | brush border vesicles  | 99     |
| Ambystoma            | 31             | bumetanide             | 13, 88 |
| androgen             | 37             | burrowing              | 21     |
| Anquilla             | 53             | calcium                | 22     |
| barium               | 12, 29, 88, 95 | calcium inhibitors     | 7      |
| basement membrane    | 32             | carbachol              | 9      |

| Subject                           | Page            | Subject                     | Page                                                                     |
|-----------------------------------|-----------------|-----------------------------|--------------------------------------------------------------------------|
| carbaminocholine                  | 22              | Larus                       | 50                                                                       |
| carbonic anhydrase                | 31, 68          | liver                       | 64, 108, 110                                                             |
| catecholamine                     | 19, 59          | malonate semialdehyde       | 64                                                                       |
| cell volume                       | 3, 4, 48        | membrane vesicles           | 83                                                                       |
| cerebrospinal fluid               | 5               | Mesocricetus                | 66                                                                       |
